

**Frank Kubic
Statement of Candidacy
For US Senator**

Frank Kubic considers himself lucky to have a chance to spare our children from the terrible trillions of dollars debt the U.S. Congress has created for them to off. Our children's life and prosperity is in jeopardy and their parents' real old age social security is too. It is just a matter of time. The future of the United States of America is in big trouble, and the cause is too much government in our lives.

Frank Kubic is the author of the *American Philosophy in the Economy*, which was a result of a speech he did in New York City to communicate with Obama on how bad he treated General Motors private investors with his awful unconstitutional pervasive hammer. This book focuses on private independence and happiness in economics. Chapter three offers a pop-up-ism way that might eliminate our children's debt entirely.

The prime issue in this special election and other election in the future is the financial integrity of the United States. Robert Byrd is no more, money backed by work must have absolute priority over hypothetical money or this country will also be no more. Idealism economic laws are not authorized in the US Constitution. They cause the fall of the economy, and extreme poverty for our children. Examples of idealist issues are: The theory of global warming; coal mining, the fear of drugs, health fears, mandatory insurance programs on every fear imaginable, oil drilling, immigration fears, keeping political promises at any cost, etc.

Frank Kubic is a World War II Navy veteran, author and retired industrial engineer. He engendered a cost forecasting tool for IBM in Kingston, New York. He gave the 10th largest hospital in the U.S. a method changing program and won the *Best Training Director Award for Maryland, Virginia and the District of Columbia*. He worked for the U.S. Department of State and gave the United States the *machine readable passport* that became the standard all over the world.

Frank Kubic is no spring chicken in body strength, but he is determined to prevent the Congress from further destroying the United States from within. If elected, Frank will not be like anyone else on Capitol Hill. Limited government as the founding fathers intended in the constitution is the best insurance to have an economy that pays for government.

Frank Kubic is the father of six children, two girls and four boys. The house in West Virginia where he and his wife Anne live was built by him and his children 25 years ago. It was constructed without any interference from local, state or federal government. The lesson in this house is the less government interferes in the lives of men, the easier it is for men to invent jobs, products, services and shelter.

There are three million American men in prison and nearly two million police officers scattered all over country finding them and then caring for them. The average cost is two million dollars a man. This is cruel on taxpayers. This does not speak well for the United States to be number one. Wisdom in congress is a laugh! Today the federal government is involved in almost everything people do and do not do. The cost for this is enormous and is invisible to most candidates for public office, but not to Frank Kubic.

Many people are feeling economic pain in America. They know this country is on the wrong path. Quite a few in West Virginia think that laws concerning personal behavior are out of control. Some feel if we loose Joe Manchin as our governor in this special election, we are all losers. Joe Manchin has demonstrated that he can stand up to the Obama's hammer to reduce coal mining in America, but this this hammer is reduces jobs in West Virginia. Joe Manchin is no dummy, he knows a hammer when he sees one. We do not need another West Virginia governor in Congress; one at a time is enough. Give Governor Manchin a raise in salary and keep him home. Give Kubic a chance to reduce the debt and increase common sense for our children's and nation's sake.

In Jefferson County West Virginia where Frank Kubic lives the commissioners forbid character building, all of them. They think rules, fees, and impact inspections on top of inspections produce an ideal place to live. Nothing could be so false. They do not realize laws have a cost and that epigram definition of practical love is "*Everything We Need and Want.*" Love is the true arbiter of happiness. But love itself is now regulated in an incognito way by politicians in many ways. Politicians who are constantly restricting something are useless in improving anything in the economy. No local official that Frank Kubic knows, know the financial consequences that a "no growth philosophy" can have on our children. Character building is the core behavior trait in every job producing activity. What is good for our children is good for us. The future belongs to our children and not politicians. Think about love and fear, and character building too when you pick your next U.S. Senator.

Exporting democracy harms the American economy. This is difficult to understand by Christian cultured people. Charity cannot produce gold or grow food. Senator Byrd milked the country for his benefit because the cow was there to be milked. The cow is the *American Philosophy in the Economy*. This cow is now economic policy in China. In America, the policy seems to be more and more government debt for our children to pay and cannot do.

Roman Senator Cicero stated that, (*Politicians are dishonest; the best men to put in the senate are wise old men*). Frank Kubic is not a politician, he is the only epigrammatist author in West Virginia. His bid for U.S. Senator is based on wisdom and a strong desire to prevent the bankruptcy of this country. Look at Greece, Spain and Iceland's credit rating. These nations have 40 percent of their people working to feeding 100 percent of their population. The US Government is the most expensive thing the American economy. Enough is enough. Bring back common sense. Listen to Kubic. *Independent children are essential for survival of the human race.*
